

DIAMOND WIRE CONSTRUCTION APPLICATION

Having the advantage of the HIP process we also manufacture diamond wires for various construction based wire cutting. All our diamond wires are offered with our high quality rubber encapsulation. From the quality of the inner steel wire to the quality of the beads our wires are assured to be robust in application.

We also can offer customized wires depending upon the customer specifications from a bigger or smaller diameter to the pitching of the bead can be matched.

DIAMOND WIRE - PRODUCT CODE

CONSTRUCTION APPLICATION

Serial No.	BPM	Bead Dimension	Spacer	Application
C30	40	10.5 x 6 mm	Rubber	Construction - General - Can be used for concrete, reinforced concrete and steel. Service life of the wire is dependent upon the material that is being processed.
C31	43	10.5 x 6 mm	Rubber	Construction - Reinforced Concrete - Wire is designed for longer life and designed to be used mainly on reinforced concrete. The C31 has a harder bond designed for difficult jobs.
C32	46	10.5 x 6 mm	Rubber	Construction - Metal - Used for dry cutting concrete, reinforced concrete and for steel. Robust design allows for good life/speed in demanding conditions.
C34	40	110 x 7 mm - Taper	Rubber	Construction - Taper Electroplated Bead design allows for faster cutting in reinforced concrete and for finish cut applications.

Made in India

Manekji Wadia Building, 127 MG Road,
Fort, Mumbai 400023, India.
